

SILOBUSTER MIXES

SEEDING RATE (LBS/ACRE)

SILOBUSTER PEA & BARLEY MIX*

100 - 150

Elite combination of forage peas & forage barley, ideal as nurse crop or straight forage.

50% LC6040 Forage Peas
50% Forage Spring Barley

SEEDING RATE (LBS/ACRE)

SILOBUSTER PEA & OAT MIX*

100 - 150

*100-120 Nurse

Elite combination of forage peas & forage oats, ideal as nurse crop or straight forage.

50% LC6040 Forage Peas
50% Forage Oats

SILOBUSTER PEA & TRITICALE MIX*

100 - 150

Elite combination of forage peas & forage triticale, ideal as nurse crop or straight forage.

50% LC6040 Forage Peas
50% Forage Spring Triticale

PLANTING TIMES

Silobuster mixes can be planted in early spring to serve as a nurse crop or early fall to fulfill forage needs.

LC6040 PEA CHARACTERISTICS

SEED QUALITY: LC6040 peas have a tougher seed coat.

DRY MATTER YIELD: LC6040 peas have longer vines, larger leaf surface, giving higher yield, more milk.

ESTABLISHMENT: LC6040 peas emerge faster, especially in cooler soils. The LC6040 seed coat contains a more effective metabolic system that imparts the ability to germinate and emerge more rapidly, when soils are wet or cool.

SILOBUSTER MIXES: HARVEST SHOULD BE BASED ON MATURITY OF SMALL GRAIN:

- Late boot stage for lactating dairy cows
- Soft dough stage for heifers, dry cows and beef cattle
