

EARTH CARPET®: SEEDS & SCIENCE, DELIVERED

New genetics are needed to keep up with evolving diseases, climates and weather patterns. That's why Earth Carpet® by DLF brings you products with improved turf traits:

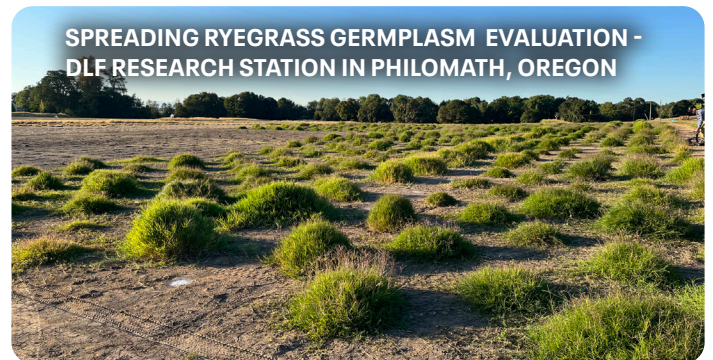

- Spreading perennial ryegrass & tall fescue
- Salt tolerance
- Longer active growing seasons
- Faster germination & establishment

CONSIDER THIS VALUE-ADDED TURF TRAIT FOR YOUR NEXT PROJECT

ST
SPREADING
TECHNOLOGY

Spreading Technology - Many perennial ryegrass products in the Earth Carpet® portfolio benefit from spreading technology, featuring early development of aggressively spreading stolons both above and below ground. These spreading traits boast improved **wear tolerance** and **recovery** plus excellent **density** and **persistence**.

We offer Earth Carpet® turf mixes with spreading perennial ryegrass – high performance varieties with stolon development that improve your landscape through long term wear tolerance to create durable, lasting turf.

PERENNIAL RYEGRASS STOLON STUDY

Table: Number of stolon per unit area (6 sq. inch) of Perennial Ryegrass

VARIETIES	TOTAL STOLON	SINGLE STOLON	BRANCHED STOLON
SR 4650	829	534	118
SR 4660 ST	810	565	90
Variety A	786	577	90
Sideways	743	443	114
Fiesta 4	676	349	114
Variety B*	615	437	76
Variety C	568	284	107
LSD at 0.5%	88	106	18
CV%	7.1	13	10
