15% Creeping Red Fescue (1 Elite Variety)

15% Chewings Fescue (1 Elite Variety)

15% Kentucky Bluegrass (1 Elite Variety)

15% Perennial Ryegrass (1 Elite Variety)

EARTH CARPET®

PLANTING OR RENOVATING YOUR LAWN

Follow these simple steps for starting a successful lawn.

1. Measure area to be seeded - Total square footage of lot less non-lawn areas such as house, walkways and gardens.
2. Test, don't guess! - Obtain soil test to identify essential soil needs/amendments (lime, potassium, phosphorus, etc). Add needed amendments per test.
3. Select appropriate Earth Carpet® seed mix - Consult with your dealer for the Earth Carpet® mix right for you.
4. Spray out lawn with herbicide containing glyphosate - Follow manufacturer's directions for proper use!

Continue to New Lawn or Renovation Steps >>>

New Lawn Steps

5. Rough Grade - Remove golf ball size+ rocks or debris. Lot slope should move downhill from house to lot edge. Level high/low areas.
6. Final Grade - Rake and smooth. Apply a fine mist from hose to soil before seeding. No puddles should form.

Overseeding Steps

5. Scalp lawn down as close as possible - Mow as low as possible without stalling mower. Rake and remove clippings.
6. Core aerate lawn to encourage abundant root growth. Plant new seed no deeper than 1/8 inch deep with mechanical planting equipment - Equipment should be available for rental in your area.
7. Apply seed evenly in two directions - First north & south then west & east. Use seeding rate appropriate for your mix.
8. Apply starter fertilizer - Important for root development.
9. Roll surface - Use an unfilled lawn roller to firm, but not over pack, the soil surface.
10. Irrigate frequently at least 3 times/day for 6 weeks - Keep top ½ inch of soil moist, not soaking. Pay attention that soil does not dry in afternoon heat.
11. Apply 2nd application of fertilizer 3 weeks after seeding (CRUCIAL).
12. Mow new lawn for the first time when it reaches 3 - 5 inches - Mow height should be 3 to 4 inches. Mowing right after irrigation may hurt seedlings.
13. Maintain mowing height to 3 to 3 1/2 inches - Never remove more than 1/3 of grass blade at a time.
14. Begin standard fertilization/irrigation programs at 8 weeks - Do not apply weed control products until lawn has been mowed at least 4 times & 8 weeks has passed.
