

Equine "Endophyte-Free" Pasture Mix

SEEDS & SCIENCE

Forage Mixes & Blends

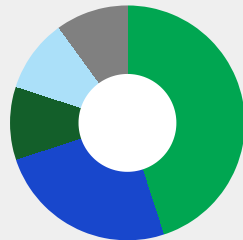

Description

Equine "Endophyte-Free" Horse Pasture Mix withstands heavy, close grazing & lasts many years. Zero endophyte, so you won't experience the problems normally associated with fescue pastures. Equine Endo-Free Horse Pasture Mix provides season long grazing of top-quality forage and is easily managed. Broadleaf weeds can be controlled with 2,4-D because this mix contains no clover or alfalfa. Mix components are subject to change without notice, subject to availability. Mixes are subject to using coated components at Deer Creek Seed's discretion. Deer Creek Seed's high quality standards and intention of mix remain intact.

Key Features

- Top-quality forage
- Endophyte-free
- Withstands heavy grazing
- Long stand persistence
- Easily managed

Components

45%	Tall Fescue
