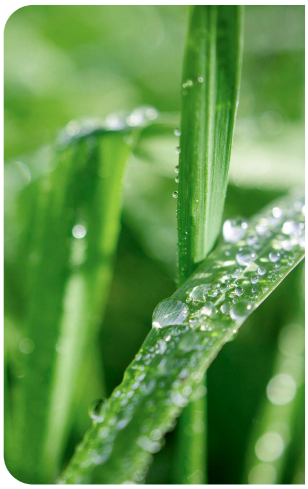
DLF

Erecta

Timothy

SEEDS & SCIENCE



Description

Erecta Timothy is a medium-late maturing variety known for its excellent palatability and digestibility, making it a top choice for high-quality forage systems. With strong regrowth after cutting and medium establishment, it provides consistent performance throughout the growing season. Erecta's adaptability ensures steady yields, while its high persistence and winter hardiness make it especially suited for colder climates and long-term forage production. This variety offers medium drought tolerance and grazing tolerance, making it versatile for both hay and pasture use. Its late maturity ensures extended forage availability, and its reputation for palatability supports better livestock intake and performance.

Key Features

- Excellent palatability and digestibility
- Strong winter hardiness
- Medium-late maturity
- Strong regrowth after cutting
- Suitable for hay or pasture use

DLF FIBER ENERGY

DLF Fiber Energy™ varieties feature enriched fiber digestibility, focusing on improving cell wall components to boost feed efficiency. These forages offer up to a 2% increase in digestibility, translating to more milk or meat production and reduced methane emissions.

Additional Specs

General Characteristics

Livestock	Cattle , Horses , Sheep
Usage	Hay , Silage , Pasture
Segment	Forage
Species	Timothy
Sci. Name	Phleum pratense
Ploidy	Hexaploid

Plant Characteristics

Emergence (Days)	10
Growth Habit	Erect

Seed Characteristics

Seed Weight	0.67g/1000 Seeds

Seeding Information

Plant Characteristics

Emergence (Days)	10
Growth Habit	Erect

Approx. Seeds/Lb.	1,152,000
Approx. Seeds/Kg.	2534400
Seeding Rate - Alone/New (Kg./Hectare)	14-17
Seeding Rate - Alone/New (Lbs./Acre)	12-15
Planting Times	Spring, Late Summer-Early Fall
Seeding Rate - Mixes (Kg./Hectare)	3-7
Seeding Rate - Mixes (Lbs./Acre)	2-6
