

# ForageMax Alfalfa

## Alfalfa

SEEDS & SCIENCE

### Description

Foragemax Power 4.2 Alfalfa coated with Microboost is a complete variety that offers the potential for greater performance, delivering unsurpassed yield performance and strong persistence even into later years. Power 4.2 establishes quickly and maintains a full and productive stand till plowed out. It is a tall, robust variety with a dense, leafy canopy. Its medium, dark green color is attractive in bale and delivers top tonnage, throughout the growing season. Power 4.2's yield performance compares with the best-known varieties available, tested against more than 85 commercial varieties, in both public and private trials, consistently rating above them all.

### Key Features

- High yield & strong persistence with a wide geography
- Good winter hardiness
- Suitable to upper Midwest and North East conditions
- High disease resistance
- Top-rated variety in 2006 registration trials in ON, Canada

Micro-Boost® is enriched with nitrogen, phosphate, manganese and zinc to help seedlings thrive in harsh environments, and its calcium carbonate casing holds moisture for the seed and acts as a pH buffer in the soil. The added weight also prevents wind drift and improves seed-to-soil contact during planting.

## Additional Specs

### General Characteristics

Segment	Forage
Species	Alfalfa
Sci. Name	Medicago sativa
