SEEDS & SCIENCE

## FESTULOLIUM\_(FESCUE\_TYPE)

### Description

Festuloliums are derived from a cross between either Italian or perennial ryegrass and meadow fescue or tall fescue. Festulolium has the nutritive, palatability, and digestive qualities of ryegrass, while maintaining the durability and drought resistance of meadow fescue. Festuloliums display strong persistence, disease resistance and winter hardiness and have season-long productivity and high forage quality.

### Key Features

- Italian Ryegrass x Tall Fescue
- Looks & grows like Tall Fescue
- Higher forage quality & very palatable
- Excellent for grazing, silage & dry hay
- Good rust resistance & winter hardiness

Festulolium 4N types deliver early growth, high yield, and persistence, while 6N types provide excellent forage quality and resilience. Both enhance pastures and hay fields with superior performance.

XL Brand products feature improved varieties from DLF, each tailored to provide enhanced value, farm flexibility and profit potential.

### Ratings

Scale 1-9, where 9 = best or most pronounced

### Additional Specs

#### General Characteristics

Botanical Name	Festulolium
Segment	Forage
Species	FESTULOLIUM_(FESCUE_TYPE)
Sci. Name	Festulolium

#### Plant Characteristics

Emergence (Days)	14
Winter Hardiness	7

## Plant Characteristics

Emergence (Days)	14
Winter Hardiness	7

## Seed Characteristics

### Seeding Information

Approx. Seeds/Lb.	227,000
Approx. Seeds/Kg.	499400
Seeding Rate - Alone/New (Kg./Hectare)	34-45
Seeding Rate - Alone/New (Lbs./Acre)	30-40
Planting Times	Spring, Late Summer-Early Fall
Seeding Rate - Mixes (Kg./Hectare)	17-23
Seeding Rate - Mixes (Lbs./Acre)	15-20
