FORAGE FIRST®
BY DLF

Grasshancer 200

Ryegrass, Italian

SEEDS & SCIENCE

Description

Forage First Grasshancer 200 Italian Ryegrass is a carefully crafted mixture of diploid and tetraploid Italian ryegrass, specifically designed to enhance forage production during the spring planting season. This versatile mix is ideal for revitalizing pastures, with the potential to double production in fields suffering from up to 40% stand loss due to winter damage. Even in the absence of damage, Grasshancer 200 can increase dry matter yield by an impressive 30%. This blend offers excellent establishment and improved persistence, making it a reliable choice for farmers looking to maximize their forage output. Grasshancer 200 is known for its high palatability and digestibility, ensuring that livestock benefit from the nutritious forage it provides.

Key Features

- Blend of diploid & tetraploid Italian annual ryegrass
- Seeded in spring to boost season production
- Excellent establishment & improved persistence
- Rapid regrowth ability for green chop or silage

GRASSHANCER™

Grasshancer® by DLF enhances forage production through overseeding and interseeding with specialized seed mixtures. It rejuvenates pastures and hay fields, extends stand longevity, and complements alfalfa plantings, ensuring fields remain productive and nutritious over time.

Ratings

Scale 1-9, where 9 = best or most pronounced

Additional Specs

General Characteristics

Livestock	Cattle , Horses , Sheep
Usage	Hay , Pasture
Segment	Forage
Species	Ryegrass, Italian
Sci. Name	Lolium Perenne
Botanical Name	Italian
Ploidy	diploid, tetraploid

Plant Characteristics

Winter Hardiness	5
Emergence (Days)	14

Plant Characteristics

Winter Hardiness	5

Emergence (Days)	14

Seeding Information

Approx. Seeds/Lb.	227000
Seeding Rate - Alone/New (Lbs./Acre)	20-40
Planting Times	Spring
Seeding Rate - Mixes (Lbs./Acre)	5-10
