DEER CREEK® SEED BY DLF

Loggers Trail Mix

Food Plot Mixes & Blends

SEEDS & SCIENCE

Description

Logger's Trail Wildlife Food Plot Mix is a blend of grasses and white clovers that will quickly produce cover. Logger's Trail is a perennial mix that will grow in low-fertility, acidic or wet soils, and areas with less than ideal sunlight. Its perfect for wooded trails!

Key Features

- Spring/fall planted perennial mix quick to establish and produce cover
- Performs well on light to heavy soil types in light shade to full sun
- Will persist in low-fertility, acidic, or wet soils and areas with minimal sunlight
- Replaces Deer Country Trail Mix
