

MasterGreen Sun to Shade Turf Mix

SEEDS & SCIENCE

Turf Mixes/Blends

Description

MasterGreen® Sun to Shade is a premium lawn mixture created for partial shade to full sun environments. With strong winter survival and a dark green color, Sun to Shade is a great addition to your lawn.

Composition:

- 50% ProNitro Coated Improved Perennial Ryegrass
- 15% ProNitro Coated Maxima 1 Creeping Red Fescue
- 15% ProNitro Coated Improved Chewings Fescue
- 20% ProNitro Coated 98/85 Kentucky Bluegrass

Key Features

- Formulated for Northern lawns
- Fast germination
- Quick establishment
- Improved shade tolerance
- Good wear tolerance and soft blades
- ProNitro coated seed

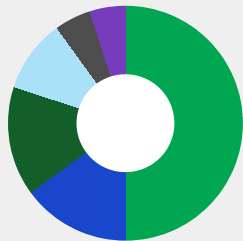

Moisture Boost Plus® crystals, ensuring every bag grows long lasting and beautiful flowers for pollinators and birds.

ProNitro® is a seed enhancement that gives developing seedlings a strong start through a controlled release of nitrogen and DLF's hydroactive water management technology. This ensures the emerging seedlings receive the full benefit of the available water and nutrients, and it encourages their roots and shoots to grow rapidly, developing strong, vigorous plants.
