

Microclover

Dwarf Clover

SEEDS & SCIENCE

Description

MICROCLOVER® - Many years of natural selection have resulted in revolutionary microclovers with all the benefits of traditional clover packed into very tiny leaves. HEALTHY & LUSH - Microclover® "spoon feeds" nitrogen to the grass, producing a healthy, dense, and naturally green lawn that is easy to maintain. WEED FREE TURF - The vigorous and dense growth of clover and grass together crowds out existing weeds and prevents new weeds from establishing. The unique dense stolon structure allows Microclover® to tolerate exceptionally low mowing heights. GREEN LAWN ALL YEAR LONG - Microclover® has been bred to stay green from spring to winter. The healthy growth of the accompanying grasses contributes to the overall attractive green color which remains throughout the year. ENVIRONMENTALLY FRIENDLY - Very little fertilizer, fungicides and water are required for Microclover®. It would be difficult to find a more environmentally friendly, cost effective, and low maintenance turf solution.

Key Features

- Naturally Green
- Crowds Out Weeds
- Tolerates Close Mowing
- Low Maintenance
- Nitrogen Enhancement

Microclover® is a small-leaved white clover that grows between turf grasses, naturally supplying nitrogen and creating a dense, resilient turf. It reduces fertilizer needs, enhances wear tolerance, and thrives in diverse conditions, offering a sustainable, cost-effective turf solution.

ProNitro® is a seed enhancement that gives developing seedlings a strong start through a controlled release of nitrogen and DLF's hydroactive water management technology. This ensures the emerging seedlings receive the full benefit of the available water and nutrients, and it encourages their roots and shoots to grow rapidly, developing strong, vigorous plants.

Ratings

Scale 1-9, where 9 = best or most pronounced

Additional Specs

General Characteristics

Establishment (Days)	14-21
First Mowing (Days)	21-28
Endophyte + (Yes, No)	No
Germination (Days)	6-10
Nitrogen Requirement (Low, Med, High)	None
Segment	Turfgrass
Species	Dwarf Clover
Sci. Name	Trifolium repens

Seeding Information

Approx. Seeds/Lb.	227000
Approx. Seeds/Kg.	500000
Seeding Rate - Alone/New (Kg./Hectare)	395-485
Seeding Rate - Alone/New (Lbs./Acre)	350-435
Seeding Rate - Overseed (Lbs./1000 sq. ft.)	8-10
Seeding Rate - New (Kg./100 sq. meters)	4-5
Seeding Rate - New (Lbs./1000 sq. ft.)	8-10
Seeding Rate - Overseed (Kg./100 sq. meters)	4-5
