

# Premium Alfalfa Dairy Mix

SEEDS & SCIENCE

## Forage Mixes & Blends

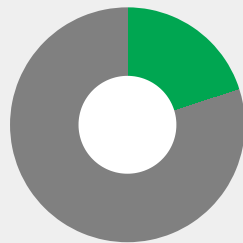

### Description

Premium Alfalfa Dairy Mix is a versatile combination of grasses and legumes. Alfalfas and clovers contribute one of the highest sources of available protein to improve growth rates and increase milk production in beef and dairy animals. Alfalfa and clover components draw nitrogen from the air and return it to the soil for use by the grasses, reducing fertilizer requirements. The grass in this mixture is selected to complement the maturity of the legumes. The alfalfa and clover in this blend come pre-inoculated and ready to plant. This seed has a protective coating and comes pre-inoculated with rhizobacteria. Mix components are subject to change without notice, subject to availability. The function and intention of the mix will remain unchanged.

### Key Features

- Versatile combination of grasses and legumes
- High protein source for better growth rates and milk production
- Reduced fertilizer requirements
- Coated
- Pre-inoculated
