Quatro

Sheeps Fescue

SEEDS & SCIENCE

Description

Quatro Sheep Fescue is an extremely fine bladed bunchgrass that produces an exceptionally dense deep dark turf. It provides durable, attractive turf under a range of mowing heights, soil conditions and growing environments. Quatro establishes rapidly from seed, yet is one of the slowest growing grasses commercially available. Quatro exhibits drought and heat tolerance and will remain green under drought stress-induced dormancy. Quatro was bred specifically for improved shade tolerance, low mowing heights and reduced maintenance conditions. It is best adapted in northern regions of the temperate cool season zones where heat and humidity related diseases are minimal. It can be successfully utilized in full sun or shade, in parks, playgrounds, golf course tees, fairways and roughs. It is compatible in turfgras mixtures containing Kentucky bluegrass, per. ryegrass, colonial bentgrass & other fine fescues.

Key Features

- Exceptionally dense, deep, dark turf
- Establishes rapidly from seed
- One of slowest growing commercially available grasses
- Exhibits drought and heat tolerance
- Bred for improved shade tolerance, low mowing heights, and reduced maintenance conditions
- Can be successfully utilized in full sun or shade

Alliance for Low Input Sustainable Turf® (A-LIST®), a non-profit that evaluates and promotes turfgrass varieties needing less water, pesticides, and fertilizers. Through rigorous testing, A-LIST® ensures our approved grasses excel in performance and sustainability.

Ratings

Scale 1-9, where 9 = best or most pronounced

Color	6
Density	6
Diseases/Insects	7
Drought Tolerance	9
Frost Tolerance/Winter Kill	8
Turfgrass Quality	6
Spring Greenup	8
Leaf Texture	8
Seedling Vigor/Establishment	7

Additional Specs

General Characteristics

Establishment (Days)	18-21
First Mowing (Days)	14-28
Endophyte + (Yes, No)	No
Germination (Days)	7-14
Mowing Frequency (Per Week)	1
Nitrogen Requirement (Low, Med, High)	Low
Segment	Turfgrass
Species	Sheeps Fescue
Sci. Name	Festuca ovina

Seeding Information

Approx. Seeds/Lb.	500000
Approx. Seeds/Kg.	1100000
Seeding Rate - Alone/New (Kg./Hectare)	225-285
Seeding Rate - Alone/New (Lbs./Acre)	200-250
Seeding Rate - Overseed (Lbs./1000 sq. ft.)	2-4
Seeding Rate - Interseed (Lbs./1000 sq. ft.)	2-4
Seeding Rate - Interseed (Kg./100 sq. meters)	1-2
Seeding Rate - New (Kg./100 sq. meters)	2-3
Seeding Rate - New (Lbs./1000 sq. ft.)	4-6
Seeding Rate - Overseed (Kg./100 sq. meters)	1-2
