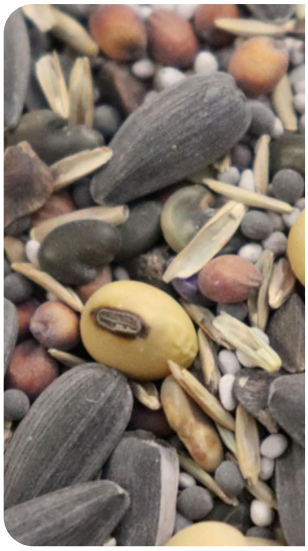
DEER CREEK® SEED BY DLF

Spring Greens Elite Mix

Food Plot Mixes & Blends

SEEDS & SCIENCE



Description

Spring Greens Elite is an innovative food plot mix that not only provides multiple seasons of maximum grazing quality for your wildlife, but also protects your soil from nutrient leaching and runoff. For best results, plant this mix in the late spring or early summer so deer and other wildlife can graze on this plot throughout the year. This mix will grow on a variety of soils and has the ability to give your wildlife quality protein, minerals, and energy to support their growth and development.

Key Features

- Late spring/summer/fall planted annual/perennial mix offering multi-year food source
- Performs well on light to heavy soil types in light shade to full sun
- Multiple species for maximum grazing quality & protects soil from nutrient loss
