

Sun to Shade Turfgrass Mix

Turf Mixes/Blends

SEEDS & SCIENCE

Description

Sun to Shade Turfgrass Mix is a mixture of cool-season grasses formulated to provide quick soil cover, minimizing weed growth and erosion. Featuring fast-germinating ryegrass, it swiftly establishes a lush green carpet, followed by Kentucky bluegrass to ensure long-lasting beauty and durability. Creeping and Chewings Red Fescue improve shade tolerance. ProNitro seed coating helps achieve stronger germination and faster establishment.

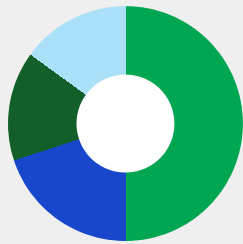

Percent Composition:

- 50% ProNitro Coated Improved Perennial Ryegrass
- 15% ProNitro Coated Maxima 1 Creeping Red Fescue
- 15% ProNitro Coated Improved Chewings Fescue
- 20% ProNitro Coated 98/85 Kentucky Bluegrass

ProNitro® is a seed enhancement that gives developing seedlings a strong start through a controlled release of nitrogen and DLF's hydroactive water management technology. This ensures the emerging seedlings receive the full benefit of the available water and nutrients, and it encourages their roots and shoots to grow rapidly, developing strong, vigorous plants.

Components

50%	Perennial Ryegrass
20%	Kentucky Bluegrass
15%	Chewings Fescue
15%	Creeping Red Fescue

Additional Specs

General Characteristics

Segment	Turfgrass
Species	Turf Mixes/Blends

Seeding Information

Approx. Seeds/Lb.	145
-------------------	-----

Seeding Rate - Alone/New (Kg./Hectare)	30-36
Seeding Rate - Alone/New (Lbs./Acre)	45447
