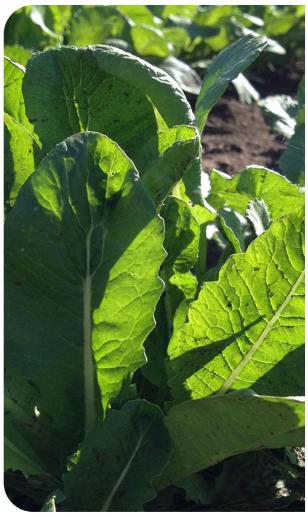
DLF

Titan

Forage Rapeseed

SEEDS & SCIENCE



Description

Titan is a high yielding, intermediate height rape which was bred to replace Maxima Plus. Titan has high aphid and virus tolerance and has shown excellent palatability against other commercially available rapes.Good animal grazing palatability is an important aspect of developing a new forage rape. The new cultivars feature increased palatability through conducting of animal grazing preference trials, comparing a new breeding line's palatability against commercially available cultivars.

Key Features

- Highest Animal Performance Rape Cultivar
- Very Good Aphid Tolerance
- Best Whole Plant Metabolizable Energy
- Multi-Graze Option with Excellent Regrowth
- Early Maturity (70-90 days)

Additional Specs

General Characteristics

Livestock	Cattle , Deer , Goats , Hogs , Poultry
Usage	Wildlife , Cover Crop , Pollinator Friendly
Segment	Forage
Species	Forage Rapeseed
Sci. Name	Brassica napus
