

Winfred Forage Brassica

SEEDS & SCIENCE

Brassica

Description

Winfred forage brassica is hybrid cross between kale and turnip. With its particularly leafy growth, Winfred is highly digestible and has good palatability for grazing whitetail, cattle, and sheep. With its superior regrowth potential, Winfred can be grazed up to four times within a growing season. Additionally, it has great frost tolerance and is known to stay green and lush when temperatures reach as low as 10F. Whether used alone or in a mixture, this variety is a solid performer and is widely adapted to a range of climates and soils.

Key Features

- Kale and turnip hybrid cross
- Highly digestible
- Good palatability
- Superior regrowth potential
- Great frost tolerance

Additional Specs

General Characteristics

Segment	Forage
Species	Brassica
Sci. Name	HYBRID BRASSICA

Seeding Information

Approx. Seeds/Lb.	180,000
Seeding Rate - Alone/New (Lbs./Acre)	3-8
Planting Times	Early Spring - Mid Fall
Seeding Rate - Mixes (Lbs./Acre)	2-4
