

York Globe Turnip

Brassica

SEEDS & SCIENCE

Description

A premium New Zealand variety, York Globe Turnip is an older, established variety that can be used for summer or winter feed. York Globe Turnip has a round bulb shape with white flesh & white skin. York Globes can be established alone for early winter feed or sowed in a pasture mix for added nutrition and grazing value. It is an earlier maturing turnip at 60-80 days.

Key Features

- Established variety
- 60-80 days to maturity
- Softer flesh
- Lower leaf/bulb ratio
- Useful as summer or winter food source
