Bermudagrass

SEEDS & SCIENCE

Description

Yukon Seeded Bermudagrass (*Cynodon dactylon*) is the best choice for turf managers needing an exceptional seeded bermudagrass, no matter what bermuda growing zone they are in worldwide! Developed by the Oklahoma State University Turfgrass Research Team, in conjunction with the USGA, Yukon's parental plants were selected in 1990 from a cold hardy study based on their high turf quality. Yukon continues to be a dramatic improvement in a seeded bermudagrass variety Yukon uses up to 25% less water than other bermudagrasses, while maintaining superior turf quality. In multiple locations and over a decade of use Yukon continues to surpass all other seeded varieties and many of the vegetative varieties for Spring Dead Spot resistance, early spring green-up and winter survival.

Key Features

- Excellent turf quality at all mowing heights
- Uses up to 25% less water than other Bermudagrasses
- Great spring green-up
- Excellent winter hardiness
- Blends well with other turf-type Bermudas
- Outstanding drought tolerance
- Superior salt tolerance
