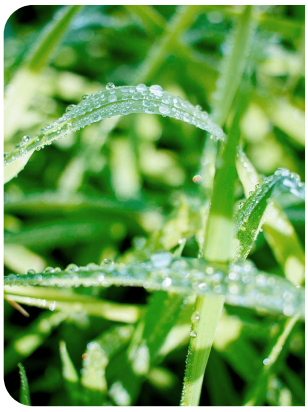
DLF

Zenyatta

Timothy

SEEDS & SCIENCE



Description

Zenyatta is very suitable for general pasture mixes and horse pasture mixes. It can be combined with alfalfa in three or two cut systems. In the high value horse hay and the export timothy markets, Zenyatta outpaces the competition. Zenyatta's consistent dark green color, minimal brown leaf problems, good standability and long seed head contributes to a high visual score. This along with high tonnage bring in top dollars for the hay producer and reseller. Excellent regrowth facilitates a profitable second cut.

Key Features

- Long seed head
- Good standability
- Brown leaf resistant
- High tonnage
- Dark Green Color

Additional Specs

General Characteristics

Livestock	Cattle , Horses , Sheep
Usage	Hay , Silage , Pasture
Segment	Forage
Species	Timothy
Sci. Name	Phleum pratense

Seeding Information

Approx. Seeds/Lb.	1,230,000
Seeding Rate - Alone/New (Lbs./Acre)	8-10
Planting Times	Early - Late Spring
Seeding Rate - Mixes (Lbs./Acre)	4-5
